

Chemist

Uniroyal Engineered Products is a leading manufacturer of vinyl coated fabrics that are durable, stain resistant, cost-effective alternatives to leather, cloth and other synthetic fabric coverings. The company manufactures automotive, specialty and Naugahyde brand products at its manufacturing plant in Stoughton, Wisconsin.

Job Summary

The **Chemist** will be responsible for experimenting and testing the company's products to make improvements to current product lines and develop new marketable products. The chemist will also collaborate with production, quality, sales, vendors and customers in support of these initiatives.

Position Duties and Responsibilities

- Develop, improve or customize products, equipment, formulas, processes or analytical methods that either brings in new business, improve cost over existing products, or improve quality.
- Provide technical support and troubleshooting for production on a day to day as well as a long term basis.
- Maintain new and existing bill of materials, production process records, control plans, and DFMEA's for new product development.
- Compile and analyze test information, write reports and prepare standards and specifications for processes, facilities, products or tests.
- Lead activity for production and finished product testing for new trials and developments.
- Ensure compliance of responsibilities with IATF and ISO requirements and audits
- Additional duties as necessary to support research & development

Experience, Skills and Abilities

- Have knowledge of commercial resins, systems, and production techniques for coated fabrics
- Required to have working knowledge of mechanical testing systems and ASTM, SAP, ISO standards
- Intermediate to advanced Microsoft Office application capabilities
- Excellent communication skills
- Self-starter with the ability to effectively interact with all levels of the organization.

Education and Technical Requirements

- Bachelor degree in chemistry, chemical/polymer engineering or other applicable field
- Advanced degrees preferred
- Five or more years of manufacturing laboratory experience preferably with polymer based products
- Color vision required

Schedule

- Monday – Friday | 8:00 AM – 5:00 PM

Ideal Location: Stoughton, WI | Only 20 minutes from Madison and Janesville!

All candidates must be willing to submit to any job-related background check, medical exam and drug screen that are required during the hiring process.
