

## **Manufacturing Engineer**

Uniroyal Engineered Products is a leading manufacturer of vinyl coated fabrics that are durable, stain resistant, cost-effective alternatives to leather, cloth and other synthetic fabric coverings. The company manufactures automotive, specialty and Naugahyde brand products at its manufacturing plant in Stoughton, Wisconsin.

### **Job Summary**

The **Manufacturing Engineer** will support the production floor in their engineering needs. This will require collaboration with the Production Supervisors as well as the quality and research/development departments.

### **Position Duties and Responsibilities**

- Evaluate existing manufacturing processes and workflows to identify areas that could benefit from changes
- Create/update process and procedures to help the company meet budgetary, performance and efficiency goals
- Collaborate with the production supervisor or quality engineer in the determination of root causes of defects or failures and devise solutions
- Provide technical support for plant production by responding to line disruptions and issues
- Be influential, articulate and persuasive, a relationship builder- establishing credibility with both production employees, internal departments and external contacts at all levels
- Flexibility and adaptability to be able to respond rapidly to unexpected events, having the ability to develop creative solutions to problems
- Research design, evaluate, install, operate or maintain mechanical products, equipment, systems.
- Confer with engineers or other personnel to implement operating procedures, resolve system malfunctions, or provide technical information
- Develop, coordinate or monitor all aspects of production including selection of manufacturing methods, or operation of product designs.
- Collaborate with maintenance in the investigation of equipment failures or difficulties to diagnose faulty operations and recommend remedial actions
- Must be able to perform other duties assigned by management.
- Ensure that the Company's IATF and ISO certification standards are being followed in the production related areas and work with supervision as necessary

### **Experience, Skills and Abilities**

- Experience in a unionized environment preferred
- Strong interpersonal, decision-making and communication skills
- Able to prioritize and reprioritize tasks
- Proven analytical skills
- Must be able to read and interpret blueprints, technical drawings, schematics or computer generated reports
- Ability to work in a fast-paced team environment as well as ability to work with minimal supervision
- Must be available to work different shifts as needed for project work

- Good organizational skills are critical due to pressures of multi-tasking demands
- Excellent problem solving skills
- Prefer working knowledge of IATF or ISO 9001 auditing programs
- Proficient in Microsoft office applications
- Ability to implement programs and supports PLC controlled machine tools or assembly machines
- SAP experience preferred

### **Education and Technical Requirements**

- Bachelor Degree in Manufacturing Engineering will consider candidates with associates degree in technical field and five years or more of work experience
- Five years' experience in a manufacturing environment
- Prefer candidates with automotive or plastics manufacturing experience
- 3D Printing and system experience
- Experience working with CAD or similar software

### **Schedule**

- Monday – Friday | 8:00 AM – 5:00 PM
