

## **Polymer Color Manager**

Uniroyal Engineered Products is a leading manufacturer of vinyl coated fabrics that are durable, stain resistant, cost-effective alternatives to leather, cloth and other synthetic fabric coverings. The company manufactures automotive, specialty and Naugahyde brand products at its manufacturing plant in Stoughton, Wisconsin.

### **Job Summary**

The **Polymer Color Manager** will be responsible for guiding activities involving the evaluation and qualification of raw materials relevant to coated fabrics and color, investigation into quality concerns, and manufacturing support through processing of all formulations. This role will work closely with all internal departments as well as the customer on a daily basis to ensure project timelines are being met, and quality standards are upheld.

### **Position Duties and Responsibilities**

- Maintain color matching system and color standards
- Oversee new color development as well as maintaining all existing color formulations
- Collaborate with Quality and Manufacturing to address quality concerns or processing issues
- Support procurement on any new raw materials related to color and coatings
- Coordinate/participate in manufacturing trials for new products
- Communicate with customer representatives on all relevant color and appearance discussions
- Manage Color Aptitude Testing and records for the facility
- Participate in supporting or primary roles for company projects
- Establish and maintain Uniroyal color matching and color standards
- Understand the application techniques of gravure and cast coating
- Manage technical relationships with vendors
- Ensure compliance of responsibilities with IATF and ISO requirements and audits
- Additional duties as necessary to support research & development

### **Experience, Skills and Abilities**

- Have knowledge of commercial resins, systems, and production techniques for coating systems
- Enthusiastically identify, research new ingredients, formulation tools
- Plan and direct cross-functional teams
- Ability to multi-task to manage the converging requirements of this role
- Detail oriented to manage the accounting and data entry aspect of the roles
- Strong organization skills to manage follow-ups as necessary in the management of shipments or deliveries to customers
- Candidates with work experience in the automotive industry are preferred
- Intermediate to advanced Microsoft Office application capabilities
- Excellent communication skills
- Self-starter with the ability to effectively interact with all levels of the organization.

### **Education and Technical Requirements**

- Bachelor degree in chemistry, chemical/polymer engineering or other applicable field
- Five or more years of coating experience preferred
- Color vision required

**Schedule**

- Monday – Friday | 8:00 AM – 5:00 PM

**Ideal Location:** Stoughton, WI | Only 20 minutes from Madison and Janesville!

All candidates must be willing to submit to any job-related background check, medical exam and drug screen that are required during the hiring process.
